

March 21, 2013

The Honorable Harold Rogers
Chairman, Committee on Appropriations
United States House of Representatives
H-307, The Capitol
Washington, DC 20515

The Honorable Nita M. Lowey
Ranking Member, Committee on Appropriations
United States House of Representatives
H-307, The Capitol
Washington, DC 20515

Dear Chairman Rogers and Ranking Member Lowey:

The undersigned organizations support sustained funding for the Food for Peace (PL 480) and Food for Progress international food assistance programs and strongly oppose proposals to eliminate or drastically reduce program funding or to shift these resources to overseas commodity procurement. Food aid programs have enjoyed strong bipartisan support for nearly 60 years because they work. Our country has the largest and most diverse, reliable, and effective food assistance program in the world. Food for Peace and Food for Progress form the backbone of those efforts.

Under both programs, there are well-honed and dependable systems for identifying the appropriate commodities for targeted populations and for procuring and shipping these commodities. These systems include prepositioning food where emergencies are most likely to occur and diverting cargoes on the high seas when an urgent need arises. The transparency, accountability, and reliability of this system are the result of decades of cooperation through a uniquely sustainable public-private partnership among thousands of committed Americans at faith-based and other non-governmental organizations, and in agriculture, labor, industry, and government.

Growing, manufacturing, bagging, shipping, and transporting nutritious U.S. food creates jobs and economic activity here at home, provides support for our U.S. Merchant Marine, essential to our national defense sealift capability, and sustains a robust domestic constituency for these programs not easily replicated in alternative foreign aid programs. Overseas, Food for Peace has a strong track record of reducing child malnutrition and increasing incomes and food supplies for very poor and vulnerable populations. Food for Progress expands business and income opportunities along the agriculture value chain and improves the quality and quantity of food supplies. Both of those programs are proven models for addressing global food insecurity.

In addition to fighting global hunger and facilitating developmental programs to end the cycle of hunger, these programs are also some of our most effective, lowest-cost national security tools. Bags of U.S.-grown food bearing the U.S. flag and stamped as "From the American People" serve as ambassadors of our Nation's goodwill, which can help to address the root causes of instability. In a time of growing global food insecurity and extremism, these programs need to be expanded, not eliminated.

We therefore oppose shifting resources to overseas commodity procurement and strongly encourage sustained funding for the Food for Peace and Food for Progress programs, preserving the unique aspects of these programs that have made them the world's most successful, most dependable humanitarian assistance programs.

Sincerely,

ACDI/VOCA
